Mindset

Participatory Surveillance

Consumer service vs. Public Health Database

Valuable to Participate vs. Duty

Interaction vs. Data Collection

Existing Channels & Media vs. New tools
Valuable Interactions

- Education
- Alerts
- Advice
- Screening
- Referrals
- Lookups
- Question Boxes
About Verboice

• Program Managers design and update their project

• Data exports & APIs
• Quick start to national scale

( Concept ➔ Design ➔ Prototype ➔ Demo )

8 hours!
Projects

• **One Health** - Informing & Advice to Masai pastoralists & sickness reports

• **Early Warning** - Early outbreak detection in South Sudan via voice & SMS

• **Animal Health** - Helping poultry farmers vaccinate efficiently

• **UXO Hotline** - Accelerating investigation and surveying of UXO incidents

• **Child Trafficking** - Supporting community volunteers & reporting hotline

• **Flu Near You** - Participatory Surveillance for ILI

Key Takeaways

- Opportunities for mobile participatory surveillance combined with health channels
- Program managers prototyped their projects! And can continue working on them on their own
- PMs will be looking for support for implementations
